

As described in RM-10785, I fully support the removal of the Proficiency of Morse Code Requirement. I would be on the air operating with my HF Station at this time if Morse Code was no longer a requirement. I personally have been studying to achieve Morse Code Proficiency since I was licensed and have been unable to pass the test. I strongly urge the FCC to pass RM-10785 and provide immediate access to all bands by all licensed Amateurs. I know by allowing this we will not only bring more Hams into our ranks but the Hams that we now have we will rekindle their interests. And just think how much of a better way we could prove that we are using our bands, and how many more of us could participate in ARES and RACES. I strongly urge the ARRL and the FCC to pass this important petition RM-10785.
